

Bill Gates Cruises In Style on “The Serene” Superyacht

When Bill Gates takes a family vacation, he goes in VIP luxury style. The Serene is a \$330 million superyacht that features 12 staterooms.

Gates is renting The Serene for \$5 million per week. The luxury yacht was anchored off the coast of Sardinia. Getting around isn't a problem as the superyacht has a private helicopter and landing pad, so land excursions a breeze.

The Serene is 450 feet long and has seven decks. The megayacht offers its own saltwater pool, a library, health spa, climbing wall, plus an outdoor theater. For nighttime entertaining, enjoy the combined 48,000 square feet nightclub.

The Serene superyacht is currently owned by Yuri Scheffler, who's a Russian and made his fortune as the distributor of Stolichnaya vodka.

Although Bill Gates doesn't own a superyacht himself, he does enjoy renting them. Gates got married on the private yacht owned by Microsoft co-founder Paul Allen. The luxury yacht owned by Allen is named the Octopus.
