

# RJ ARRAW Marine Collection – Sport Chronographs for All Seasons

The highly respected [RJ](#) watch brand was founded in 2004, then re-launched in 2018 under the creative direction of CEO Marco Tedeschi. RJ brings a distinctive design to every wrist with the stunning **ARRAW Marine chronograph collection**. It's an impressive luxury watch collection!

The ARRAW Marine chronograph is a 10-piece limited edition series. It's the perfect chronograph for all seasons, offering both men and women sophisticated form and function to complement an active lifestyle. RJ proudly manufactures its own in-house movements at the brand's headquarters, RJ Studio, based out of Geneva, Switzerland.

RJ has balanced striking form with impressive functionality in the ARRAW Marine. These incredible timepieces demonstrate the independent watchmaker's excellence in the art and craft of horology. They are executed in a stand-out style inspired by the marine world.

The ARRAW Marine's iconic design is instantly recognizable thanks to its four RJ Bumpers. These rubber bumpers punctuate the models' 42 mm or 45 mm satin-brushed cases. These are available in collectors' choice of 18 karat red gold, titanium, two-tone red gold and titanium, or black ceramic. The rubber motif carries through to the coordinated white or black rubber accents on the screw-down crown and push buttons.

The RJ Bumpers also draw the eye inward to admire the ARRAW Marine's sun-brushed, galvanized, and gradient-painted dial. Transparent lacquer emphasizes each dial's dimensional effect, encased within a domed anti-reflective sapphire crystal.

Bold detailing brings each element of the dial into sharp focus. From the hands to the chronograph subdials, which include a small seconds counter at 3 o'clock and a 30 minutes counter at 9 o'clock. Plus find a 12 hours counter and date window at 6 o'clock.

Indexes, numerals, counters, and hands are uniformly plated in red gold or rhodium-plated. The finish is with a satin-brushed texture and enhanced with white SuperLuminova. The resulting visual impression is both cohesive and highly legible.

The bezels of select ARRAW Marine timepieces have been set with round brilliant or baguette cut diamonds. While the surfaces of a few special models have been fully paved with diamonds, from the bezel to the case. The sparkling diamond set ARRAW Marine models feature anywhere from 1.5 total carats in diamond weight to over 5 carats total.

The self-winding chronograph offers up to 42 hours of power reserve. A screw-down crown protects the movement from the elements, reinforcing the water-resistance of the ARRAW Marine up to 330 feet. RJ has also equipped the ARRAW Marine with a clever interchangeable ARRAW rubber strap. Users can easily swap out other RJ strap colors and styles as they please, with no tools required.

RJ has made its own mark on modern watchmaking with its Collaboration watch series. Their watch designs draw inspiration from icons of pop culture, from superheroes of DC Comics or Marvel like Batman and Spider-Man. Even beloved video game characters like Super Mario Bros., Space Invaders™, or Pac-Man™.

RJ also designs and produces recognizable, ambitious, and culturally relevant luxury Swiss watches. RJ ARRAW, the brand's core collection for men and women, is distinguishable by its RJ Bumpers™ and ingenious interchangeable strap system.

In addition, RJ has brought history-making material to the

wrist with its DNA Concept watches. They use steel from the Titanic, genuine moon dust, or remnants from the Apollo 11 spacecraft. Of course, it first landed man on the moon in 1969.
