

Fractional Private Aircraft By Avantair

Avantair

In the luxury world of private air travel, comfort and convenience are no longer exclusive to just billionaires on G-5's.

If you want to travel in style, then consider the Ferrari of the sky – Avantair's fractional private aircraft.

This exclusive aircraft by Avantair – Piaggio P180 Avanti II – is engineered by a Ferrari-family majority-owned manufacturer and they provide the lowest fuel burn and carbon emissions in the entire industry.

The private aircraft market continues to be strong and show resilience to current economic conditions. A recent report published by the research firm ARGUS showed that private aircraft flights in January 2010 increased by 5.3 percent over January 2009.

Avantair's aircraft combine both the speed and top-notch, first class service only dreamt of on today's commercial flights, In addition, it's at a price that allows access for many affluent flyers.

For the affluent traveler, an Avantair aircraft features oversized leather seats in a stand-up cabin more commonly found in mid-sized aircraft.

Avantair

One of the key drawbacks of other companies is limited availability. But Avantair planes can land at over 5,000 airports that most planes simply can't access. The end result is getting travelers closer to where they need to go.

Based in Clearwater, Florida – Avantair continues to take deliveries of new aircraft. The company expects to nearly double the size of its fleet in the next three years. Avantair currently manages a fleet of 55 aircraft and plans to add 52 more planes by the end of 2013.

President and CEO of Piaggio America, John M Bingham stated, "We are delighted to partner with Avantair to provide an

aircraft with an unrivalled, cost-effective solution for personal air travel. The Piaggio P180 Avanti II aircraft that Avantair flies enables the Company to carry its rapidly increasing number of customers in an enormously spacious and comfortable cabin.”

Avantair’s fractional ownership provides all the advantages of owning an aircraft without the hassle of the costs or maintenance that go along with whole aircraft ownership.
