

Tradition Breguet 7047 Tourbillon Fusee, Rose Gold Watch

Breguet

Breguet has become such an intrinsic part of not only European culture, but the worldwide luxury watch industry. Breguet's emblematic "Tradition" collection is being enriched this year with an original model in 18-carat rose gold.

This "Grande Complication" timepiece features a tourbillon, fusee and chain transmission, and a Breguet balance spring in silicon, joins the existing models in yellow gold and platinum. Inspired by the legendary *souscription* watches created by A.-L. Breguet, this objet d'art symbolizes both a return to roots and a resolutely forward-looking brand vision.

The Tradition Breguet 7047 Tourbillon Fusee luxury watch's pure, modern aesthetic sets the stage for the tourbillon and the fusee and chain transmission located on the upper part of

the mainplate. This sculptural piece highlights the contrast and relief effects, giving vibrant life to each component. These technical accomplishments symbolising Breguet's horological excellence are duly protected by four patents.

Back in 2006, Breguet presented the first watches with silicon balance spring and escapement. The flat silicon balance springs, made using a raised terminal curve, also known as a "Breguet overcoil", were recognised as an authentic feat by the watch industry. The rose gold re-edition of the "Tradition 7047PT" also features a silicon Breguet balance spring, as well as a new black galvanic-coated and engine-turned 18-carat gold dial.

This highly technical new rose gold model is a source of legitimate pride for the Manufacture Breguet, which remains firmly in the vanguard of research and development. Not content with merely inventing, it also displays the ability of the House to combine technological innovation with aesthetic appeal.

Tradition Breguet 7047 Tourbillon Fusee, Rose Gold Watch Features:

- **Case** in 18-carat rose gold with a finely fluted caseband. Sapphire crystal back. Diameter 41 mm. Rounded lugs welded to the case, screw-secured spring-bars. Water-resistant to 3 bar (30 m).
- **Dial** in black-coated engine-turned 18-carat gold, off-centred at 7 o'clock. Individually numbered and signed Breguet. Chapter ring with Roman numerals. 60-second tourbillon at 1 o'clock. Polished steel "moon" tip Breguet hands.
