

Tockr Salutes the Seas, Skies, and America's Past, This Holiday Season

[Tockr](#) is an American watch brand with a Swiss-made heart, founded in Austin, Texas in 2017 by Austin Ivey and co-founded by Sophy Rindler. Now you can shop the new Bronze SkyTrain Watch, as seen in the iconic **2019 Neiman Marcus Christmas Book**.

Tockr has taken inspiration from the skies, the seas, and iconic pieces of America's past for its latest watch collections. Each luxury timepiece has its own story to tell. Therefore they appeal to a wide variety of gift-givers and recipients this holiday season.

Give a piece of the past and give back in the process with two limited-edition Tockr watch series, with a portion of proceeds going to charity organizations. The USS Texas incorporates salvaged material from a historic World War I battleship. In addition, the **D-Day C-47** series features salvaged material from an iconic **World War II** paratrooper transport.

Give something exclusive, like the new Bronze Skytrain, which takes flight this season in the Neiman Marcus 2019 Holiday book and on Tockr.com. Go big with a classic Air Defender chronograph or make a big splash with a customized Air Defender Hydrodipped. Therefore, each unique watch will make an ideal gift for anyone who appreciates sporty gear that also comes with a good story.

New Bronze SkyTrain Pilot Watch Takes Flight in Neiman Marcus 2019 Holiday Book

Neiman Marcus

Tockr created a new Bronze edition SkyTrain, released just in time to take flight in the 2019 edition of the much-anticipated Neiman Marcus Holiday Book and on Tockr.com. This is the watch for those who appreciate fine detail and the classic styling of a pilot's watch. The new Bronze SkyTrain offers a new sunburst green dial with a coordinated drab green quick-change leather strap. These fine quality watches are available only in Neiman Marcus stores and online at Neiman Marcus and Tockr.com.

Named after the iconic World War 2 era U.S. Army warbird known as the SkyTrain, this new bronze model weaves aviation-inspiration throughout its streamlined dial. From the crosshairs to the luminous airplane-tipped second hand, it's quite stylish. The 42mm cushion-shaped bronze case is water-resistant up to 50 meters and contains an ETA-2834-A6 movement that offers a hearty 42-hour power reserve.

Give a Piece of History, Benefit Local Texas Charities with the USS Texas and the D-Day C-47 Watches

Inspired by his own experience as a pilot and the legacy of his grandfather. As a U.S. Army pilot who flew C-47 aircraft during World War II, Founder Austin Ivey set out to combine his lifelong passions. The combination of watches and aviation in an accessible collection of aviation-inspired watches is

the result. In a short time, Tockr's iconic C47 and Air Defender watch collections have already captured the imagination of watch enthusiasts around the world.

Give a Piece of History, Benefit Local Texas Charities with the USS Texas and the D-Day C-47 Watches

Texas-based brand Tockr was proud to partner with the Battleship Texas Foundation to produce a special series of watches, the Tockr USS Texas. Each feature salvaged material from the historic USS Texas naval vessel and the world's only remaining dreadnought. Plus, Tockr will donate over fifty percent of the proceeds from each sale to The Foundation. This helps to get the "Mighty T", back in fighting shape as she prepares to reopen as a national park by 2021.

Each 42mm Tockr USS Texas watch features applied luminous indices and a date window. In addition, find a luminous silhouette of the battleship encircled by a salvaged portion of the USS Texas herself in the chapter ring. The 316L steel case houses a high-grade Swiss quartz movement. Plus each case back bears engravings of the Battleship Texas Foundation insignia and a unique serial number. Two USS Texas watch

variations will be offered. First is one with a white dial, pink indices. In addition, there is a white rubber strap and a black dial and coordinated strap. Lastly, all watches come with a certificate of authenticity signed by The Foundation.

Tockr was proud to produce the D-Day C-47 watch series in partnership with the Dallas-based Commemorative Air Force (CAF). A portion of proceeds from each sale benefits CAF's charitable efforts to restore and maintain this historic aircraft and to educate future generations. Continuing, each watch dial has been crafted from aircraft material salvaged during the restoration of "That's All, Brother." It's the World War II paratrooper transport that led the combat charge into Normandy 75 years ago.

Dials vary from slightly worn Clean Cut dials to heavily weathered Stamped dials and Hard Worn dials. Each watch preserves the plane's original markings with special sealant under a sapphire crystal. The 42mm cushion-shaped case houses a Swiss automatic ETA 2834 A6 movement. All D-Day C-47 models come packaged in a keepsake wooden box complete with two straps – a drab green canvas strap and a brown leather band. Gift a limited-edition D-Day C-47 bronze edition (one of only 75 pieces) or a stainless-steel edition, one of only 500 in the world.

Give the Gift of High Performance with the Tockr Air Defender Series

Those on the move need a watch that can keep up. Gift the Tockr Air Defender chronograph to anyone who needs a stylish watch that also offers long-running performance. The 45-millimeter stainless-steel chronograph takes visual cues from classic 1970s era pilot watches while adhering to strict NATO specifications. You get water-resistance up to 100 meters, vivid luminescence, and a 42-hour power reserve. Due to its top-grade Valjoux 7750 Swiss-made automatic movement.

The Air Defender's many colorful options include matte black, sunburst blue, dark green, panda, or silver dials paired with a brushed, polished, or PVD coated stainless-steel bracelet. Also it comes with a hand-stitched calfskin leather strap, or a custom "Stealth" Strap by HIX Design studio.

For those who appreciate daring design, the Air Defender Hydrodipped makes the perfect holiday gift. Tockr is one of the only watchmakers in the world to adopt hydrographic printing to adorn its watch cases. It's a fascinating immersion printed technique, long associated with motorsports and industrial design. But also a renegade choice for the world of watchmaking.

The bold prints offered include Tie-Dye, Magma, black or blue Carbon, black or green Camo, or special custom patterns from a

library of graphic themes. Complete the custom look with hydrodipped dial elements and coordinated straps, from hand-stitched calfskin to alligator to toad leather straps. Plus choose a custom “Stealth” strap, created in partnership with the HIX Design studio.
