

Top Fuel Efficient Luxury Cars

It's no surprise that the most fuel-efficient luxury cars sold in the United States aren't homegrown. They are imported.

Europe and Japan lead the fuel-economy crusade for the luxury sector. A major reason is because economic conditions in those regions, have given local automakers major incentives to develop cars that conserve fuel while still providing amenities that luxury shoppers crave.

"European automakers have had to be conscious of fuel economy for decades," says Mike Omotoso, senior manager of global powertrain forecasting for J.D. Power and Associates in Westlake Village, Calif. "In Europe, high-tech includes good performance coupled with good fuel economy." [Full article](#)
