

Two New Lady 8 Flower Watch Models from Jaquet Droz

For those looking for a stunning lady's luxury watch, consider the two new **Lady 8 Flower** watch models from **Jaquet Droz**. Each of the two new models is a limited edition of 8 pieces.

First introduced in 2015, the Lady 8 Flower watch collection immediately became a hit in the watch industry. The watch became the first Automaton collection fully dedicated to women. This milestone became a proud moment for Jaquet Droz. Plus it was a turning point in the history of the luxury brand.

The new Lady 8 Flower collection features gorgeous floral motifs. They honor the naturalist tradition of the brand. In the white gold version, the dome-shaped Grand Feu enamel dial blooms with Lotus flowers engraved in bas-relief. The intensity and depth of the palette of blues are carefully tweaked, This is done by adjusting the amount of enamel powder applied in each firing.

Lastly, the final step is to carefully polish the surface of the dial to produce a perfect dome shape. The second dial showcases a lace-like bouquet of flowers carved from mother-of-pearl. Each model is set with 249 diamonds on the bezel, ring and buckle.

The automaton of this stunning watch is positioned at the top of the Lady 8 Flower. It is animated by a pusher at 2 o'clock. When the pusher is pressed, it activates a lotus flower. The incredible gold petals slowly open to reveal either a diamond or a sapphire.

The watch's precious stone is also animated. It swivels in the opposite direction when the Lotus opens and closes. The result is it beautifully displays every facet of the glittering

briolette cut.

In this watch collection, you will notice the figure 8. Like others from Jaquet Droz, the figure 8 is a symbol of perfection and harmony. It is formed when the watch dial is overlaid with the dial of the automaton.
